*"Five years ago, we were brought to a standstill. Our telecommunications system was maxed out and we couldn't support the number of users we were trying to put on the system or service any additional people in the community. We received a glowing referral from a Nassau County, NY-based organization whose MIS Director advised us to go with Optimum Lightpath for their quality of service and all-fiber based Ethernet network. He was right. Choosing Optimum Lightpath was a no-brainer."*

-- Larry Daniels, Director of Operations at Family Service League.
